

VULNSESSIONE

ALPHA TEAM 6

Vulnessione is full of refreshing greenery. Many places do not care for plants, nature, and other organisms' well-being. So we made sure to incorporate PLENTY of walk-in gardens. As you can see, the bottom is blue to represent water. Above the water is grass. And at the top is a sunroof.

Walk-in Garden

TRANSPORTATION

The V6 Transport center is the landing point for the massive hovercrafts and people movers and a site to buy, sell and get in electric busses and cars.

The hover pods hover above any surface while carrying crowds. They work as platforms that float around an area specified by a captain. Great for tourism!

Vertical Farming

In our city, we have vertical farming. These farms also include rooftop gardens like most of our buildings to keep the air fresh for our citizens. We chose vertical farming for our city because it is sustainable, has better use of space, conserves water, not chemicals or pesticides, and has a smaller ecological footprint.

Apartments/Housing

With such high-end buildings in Vulnessione, we decided on making circular neighborhoods to preserve land space. Circular neighborhoods also increase the amount of social interaction between residents. Lastly, our apartments and buildings are as eco-friendly as they can be. Every building is made of recycled steel and precast concrete, ensuring that all materials are reusable.

(Our buildings are also handicap-friendly)

Restaurants

In our city, we incorporate healthy ingredients into our foods. There are multiple places to sit down and grab a bite. Including our delicious pizzeria, ice cream shop, and a rotating restaurant next to the seaside!

Shops

Some of the meet-up spots in our city include a library where you can look out at our beautiful ocean while having a good read. We also have a cafe and a movie theater.

Amenities of Vulnessione

Here at Vulnessione, we want every citizen to get out and have fun. Therefore, we added amenities such as a library, movie theatre, and a cafe. Our library contains many of the most popular books and offers classes for any person to become an author. Our movie theater provides an experience like no other. When watching a movie, you will have in-life effects around you to ensure you get the total movie experience. Lastly, our cafe has a quiet and peaceful atmosphere, guaranteeing that you'll be able to hang out with your friends or get work done at any time.

Beautiful Mountain Ranges

Next to our beautiful city, we have a mountain range surrounded by water. It is accessible by a water filter/bridge to ensure that the water goes in, used and dirty, and comes out fresh and clean.

Full model:

CONCLUSION

In conclusion, our gorgeous city has so much to offer. From the mountain ranges to the bright lights of the city. Vulnessione is an amazing experience and an even better home.
